

Business cards

One design. A card for each person. Ready to check and print.

Bruno designs both sides of your card from your direction and the saved workspace context you choose. You do not have to design the layout. We will review a Friday Coffee team design, optionally update Maya's title, then add Leo as a second card holder and use the print action.

Before you start

- Have the company name, each person's details, website and optional logo/brand direction ready. Example contact details in this guide are fictional.
- Create a new design when you want a different look. New Card Holder reuses an existing design for another person.
- If you include a QR code, use your complete website address and scan the finished code before ordering printed cards.

All screenshots show the actual Bruno interface with a fictional Atelier Demo account and simulated requests. Sample deck pages, card artwork and menus are illustrative content supplied to the real renderers, not proof of a new paid generation. No real account, payment or provider was changed.

Start with the card workspace

Let the saved job finish

Update a person's details and save

Add another person without starting over

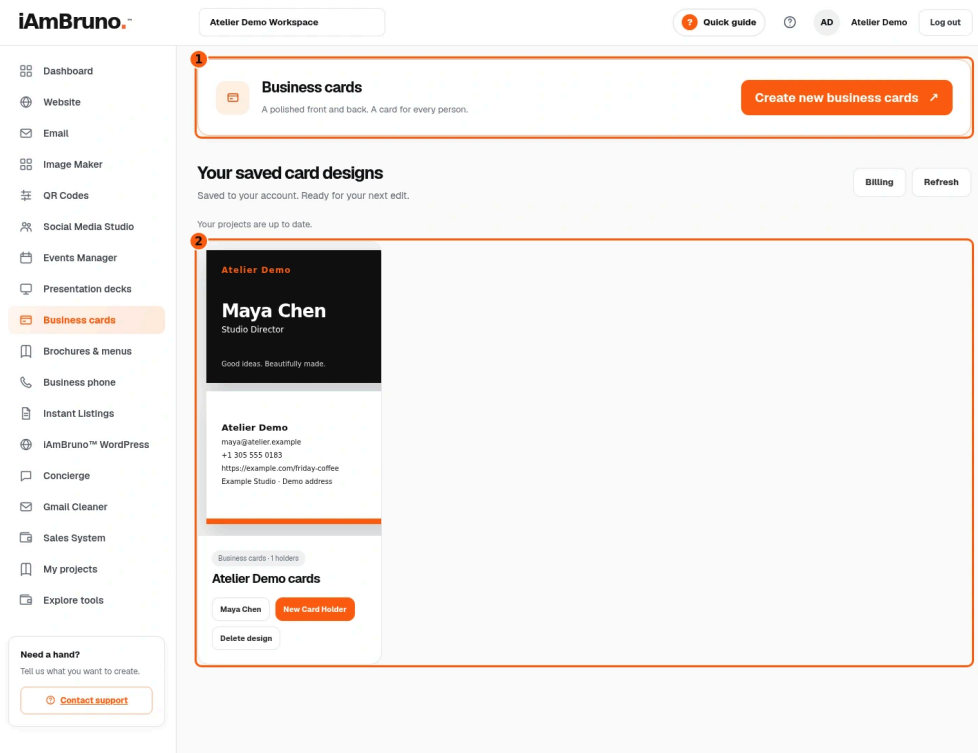

Give Bruno useful direction

Check the front and the back

Make a PDF or a print proof

Find both saved people later

Start with the card workspace

Atelier Demo - Example account and simulated responses. Illustrative sample artwork, not a new live generation.

- 1 Request a new front-and-back design.
- 2 Existing designs stay in your saved library.

Choose Business cards in the main menu. You will see the new-design action and existing saved card designs.

To change a saved person, choose their name in the relevant design. To add a person with that same look, choose New Card Holder.

For this example, choose Create new business cards to request a new design.

WHAT HAPPENS NEXT

The direction form opens. No new design has been produced yet.

Give Bruno useful direction

YOUR NEXT GREAT INTRODUCTION

x

Design your business cards.

Direction (optional)

1

Design Friday Coffee team cards. White, black and vivid orange. Use Atelier Demo; Include Maya Chen, Studio Director, maya@atelier.example, +1 305 555 0183 and https://example.com/friday-coffee.

2

Let iAmBruno™ use my website and workspace information

3

Include a website QR code

One front-and-back design, saved to your account. Add card holders and edit their details before printing.

4

Design business cards →

Atelier Demo · Example account and simulated responses. Illustrative sample artwork, not a new live generation.

- 1 A specific filled direction.
- 2 Choose whether to use your saved brand context.
- 3 Choose whether the design should include a website QR.
- 4 Submit the design request.

With Use my website and workspace information selected, Direction is optional. Leave it blank for Bruno to design from saved context.

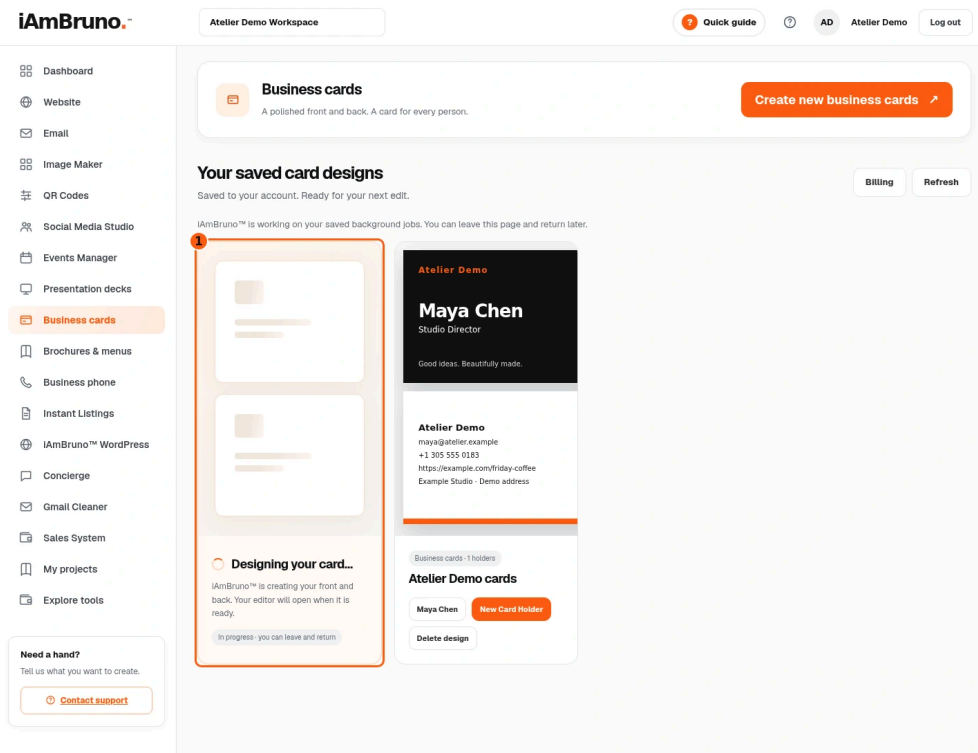

Add direction only for a particular style or details; the picture is this optional custom-brief example. If saved context is off, a brief is required.

Choose whether to include a website QR, then select Design business cards. Bruno creates and saves both sides in a background job.

WHAT HAPPENS NEXT

The form closes and a saved background task appears in the library.

Let the saved job finish

Atelier Demo - Example account and simulated responses. Illustrative sample artwork, not a new live generation.

- 1 The real in-progress task in the library.

Designing your card means the front and back are still being prepared. Do not submit a duplicate request because the result is not immediate.

You can leave and return while Bruno checks the saved job. Your earlier card designs remain available.

When the result is ready, the card editor opens. If the task reports an error, read that message and retry only when the cause is resolved.

WHAT HAPPENS NEXT

A successful job becomes a saved design and opens its holder editor.

Example Studio · Demo address

Your saved design stays the same. These details belong to this card holder.

Atelier Demo · Example account and simulated responses. Illustrative sample artwork, not a new live generation.

- 1** The current card holder.
- 2** The actual front-and-back design preview.
- 3** Save the checked holder details.

Read every field, including the person's name, job title, email, phone and website. Generated details still need your check.

Look at both sides of the preview. Confirm the logo, spelling, spacing and QR placement. A tiny preview is not enough for a print order: zoom or inspect the printed proof.

Save card holder stores this person's details. Changing these fields is different from requesting a completely new design.

WHAT HAPPENS NEXT

The design is ready for a deliberate contact-detail correction or a saved proof.

Update a person's details and save

Your saved design stays the same. These details belong to this card holder.

Atelier Demo · Example account and simulated responses. Illustrative sample artwork, not a new live generation.

- 1 The updated title.
- 2 The save confirmation.
- 3 The preview reflects this holder's edited details.

Change the field you need. We change Maya's Job title to Creative Director. The preview updates while you type.

Choose Save card holder. Wait for Your card holder is saved before closing. An error is not a save confirmation.

Recheck both sides, including any QR destination, after saving. The company design remains the same.

WHAT HAPPENS NEXT

Maya's saved holder now uses the corrected title without creating another design.

Example Studio · Demo address

Your saved design stays the same. These details belong to this card holder.

Atelier Demo · Example account and simulated responses. Illustrative sample artwork, not a new live generation.

- 1 Open the browser's print controls.
- 2 Both faces should be checked in the output.

Choose Print in the card editor. Your browser's print dialog opens; this guide shows the button that opens it, not a fabricated operating-system dialog.

Choose Save as PDF for a file, or choose your printer. Check that both card faces are included. Review paper size, scaling and backgrounds in the preview before saving or printing.

For professional production, give the printer the final proof and confirm their bleed, trim and duplex requirements. A browser PDF alone is not confirmation that a print shop's requirements are met.

WHAT HAPPENS NEXT

You can save a PDF or print a proof from the current holder. The saved library design remains available.

https://example.com/friday-coffee

Example Studio · Demo address

Your saved design stays the same. These details belong to this card holder.

Atelier Demo · Example account and simulated responses. Illustrative sample artwork, not a new live generation.

- 1 Leo is a new holder, not a renamed Maya.
- 2 This person's separate email.
- 3 The shared design with Leo's own details.
- 4 Save Leo as another holder.

Close the editor and choose New Card Holder on the intended saved design. Company information and the design are reused; personal fields start blank.

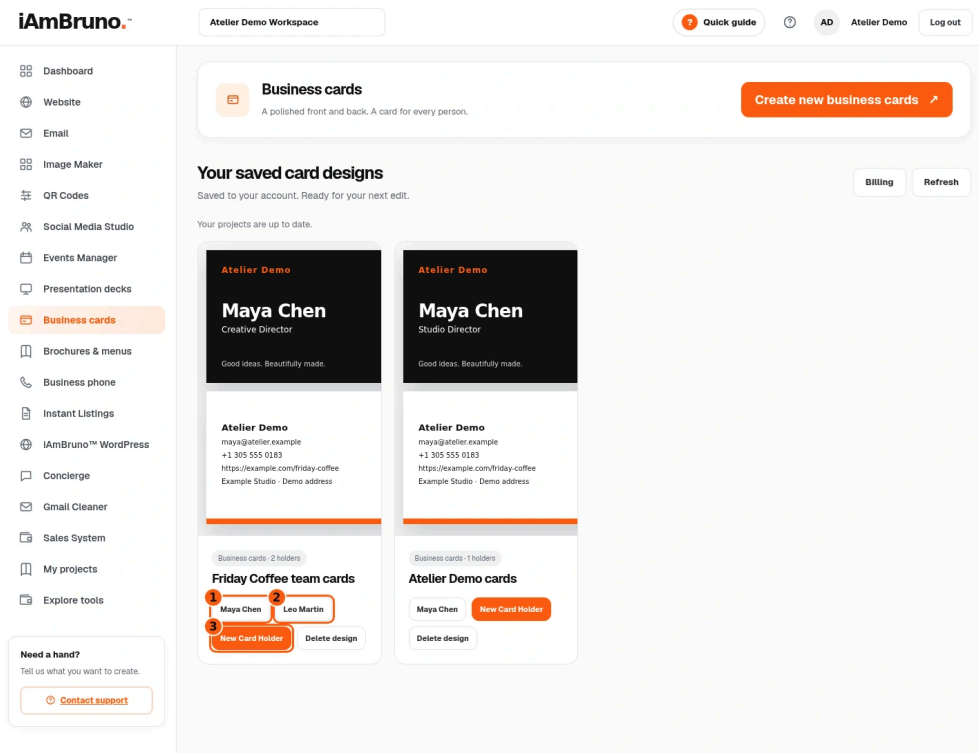

Enter the new person's name, title, email and phone. Our example uses Leo Martin, Client Partner. Confirm the website and address that were retained.

Review the live preview, then choose Save card holder. Do not overwrite Maya's saved entry if you meant to create a second person.

WHAT HAPPENS NEXT

The design has a second independently saved card holder.

Find both saved people later

Atelier Demo - Example account and simulated responses. Illustrative sample artwork, not a new live generation.

- 1 Maya's saved holder.
- 2 Leo's separately saved holder.
- 3 Add another person to this same design.

Back in the library, the design now shows a button for Maya and a separate button for Leo.

Choose the correct person's name to edit or print their card later. New Card Holder adds another person using this design.

Delete design removes the design and its holders after confirmation. Use it only when you intend to remove that shared work.

WHAT HAPPENS NEXT

You can reopen either person without regenerating the design.

Come back whenever you need it.

Use the short Quick guide for a reminder of the main controls. Use this manual for the full task and the related Studio guides for each tool's detailed workflow.

In your dashboard, choose **Quick guide → Show me around** to replay the short tour. Use **Read the guide** or **Download PDF** for these complete instructions.
