

Your dashboard

Find your services. Open a tool. Add something new.

Your dashboard brings your business identity, the services you already have, and the tools you can add into one workspace. This guide shows an example account with active services. Your own list depends on what is included in your account and what you have activated.

Before you start

- Sign in to the Bruno account that owns your services.
- This example business is Atelier Demo. Your dashboard shows your own business and services.
- Opening a menu item, tile or details window does not itself purchase a service or submit a creative request.

The screenshots show Bruno's actual interface and original product code with a fictional Atelier Demo account. Requests and payment/job responses are simulated. Example artwork is supplied for instruction; this guide did not run a new paid generation or charge a customer.

First, know where you are

Work inside the tool, then come back

Review before activating

Check renewal and paid access

Update the business logo

Open your site or its editor

A new account can have no active add-ons yet

Open a service you already have

Find a tool you do not have yet

If payment is still pending, check it—do not buy twice

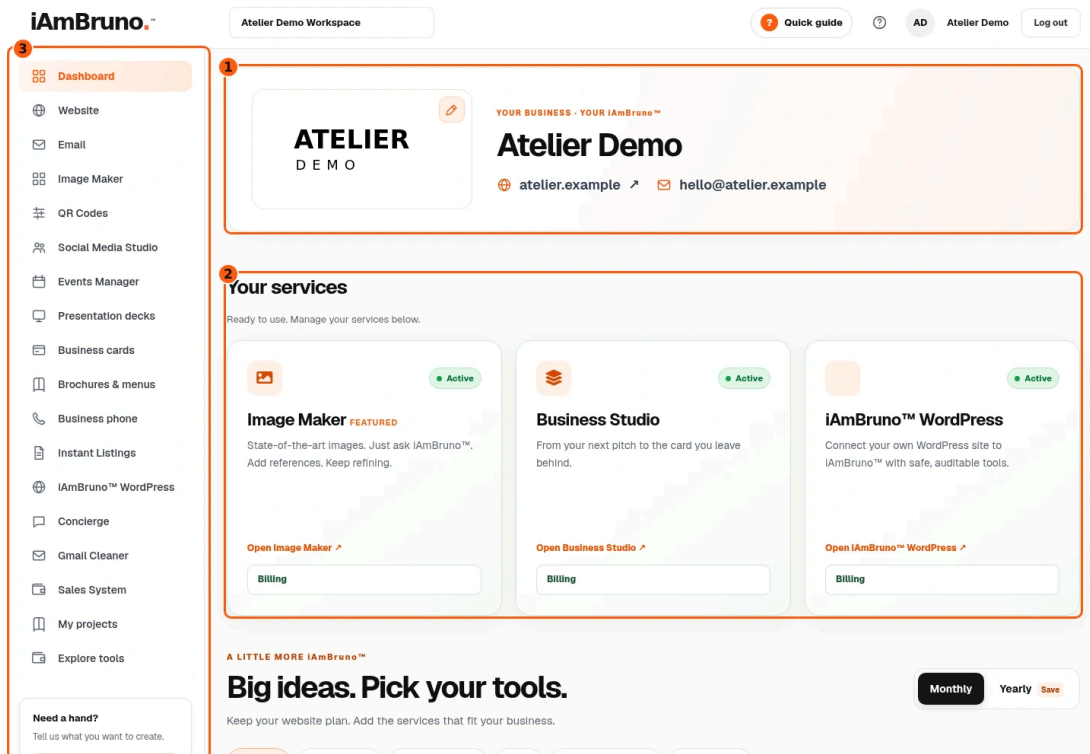

Pause at the cancellation confirmation

If your account includes a website plan

Open your included business email

Using Bruno on your phone

First, know where you are

Atelier Demo - Example account and simulated responses.

- 1 Your business identity: logo, website and contact address.
- 2 Tools already active or included for this account.
- 3 Navigation: open a service or return to Dashboard.

The business name, logo, website and email at the top identify the workspace you are using. Check these before starting work.

The left menu opens each part of Bruno. Dashboard returns here. My projects opens your creative library. On a phone, open Menu to see these links.

Your services contains tools already included or active for this account. The catalogue below it shows tools you can explore or add. A menu link or a catalogue card is not proof that a paid service is active.

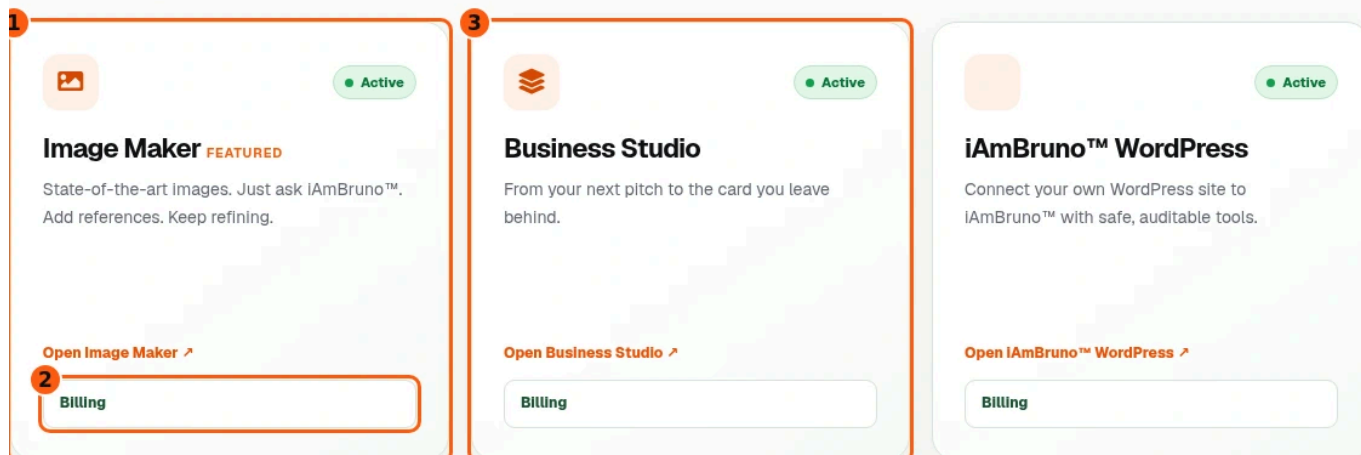

WHAT HAPPENS NEXT

You can identify the current business, find the navigation, and distinguish active services from available tools.

Open a service you already have

Your services

Ready to use. Manage your services below.

Atelier Demo · Example account and simulated responses.

- 1 Open Image Maker by clicking this tile.
- 2 Billing shows renewal and access details.
- 3 Business Studio opens your saved creative projects.

Find the service in Your services. Its Active badge means the account has access.

Click the Image Maker tile, or the Open Image Maker area at its bottom. Avoid Billing when you want to use the tool. The whole tile opens the service; it does not start an image or buy another subscription.

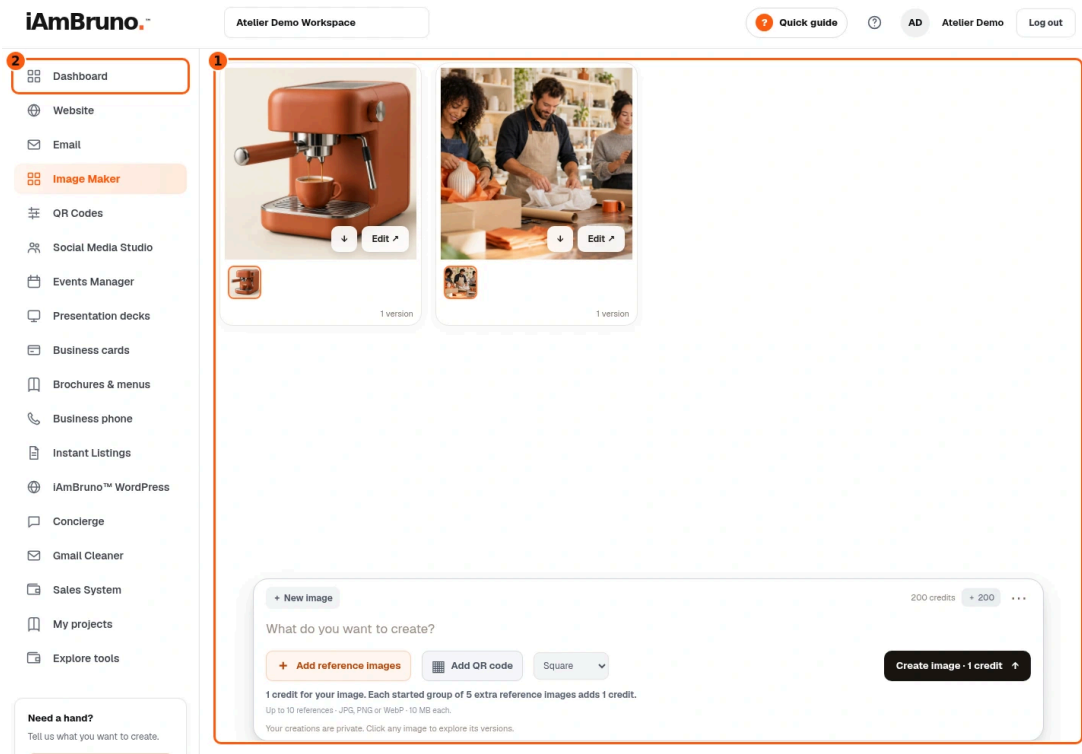

Business Studio opens your creative projects. Presentation decks, Business cards and Brochures & menus also have their own links in the main menu.

Billing opens the service's access and renewal details. It is not the button for creating your next image or document.

WHAT HAPPENS NEXT

The selected tool opens with its own controls and saved work.

Work inside the tool, then come back

Atelier Demo · Example account and simulated responses.

- 1 Image Maker's own saved work and creation area.
- 2 Dashboard returns to your services.

This example opens Image Maker. The highlighted menu item tells you which tool you are in.

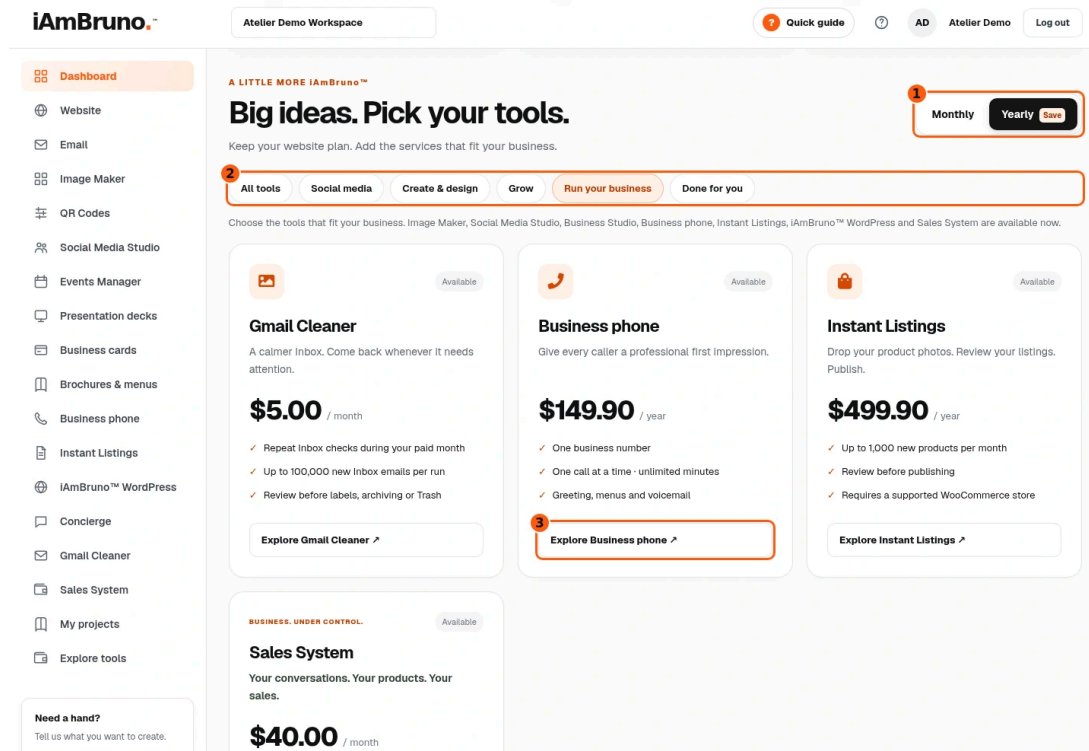

Use the tool's own creation controls to begin a request. Existing images or projects remain in that tool's saved library.

Choose Dashboard in the menu to return to your services. Choose Quick guide inside a tool to read its manual or replay its tour.

WHAT HAPPENS NEXT

You can move between your dashboard and a service without confusing navigation with a creation or purchase.

Find a tool you do not have yet

Atelier Demo - Example account and simulated responses.

- 1 Monthly or Yearly pricing, where offered.
- 2 Category filters narrow the catalogue.
- 3 Explore opens details for this unowned tool.

Scroll to Big ideas. Pick your tools., or choose Explore tools in the menu.

Use categories such as Create & design or Run your business to narrow the list. All tools restores the full list.

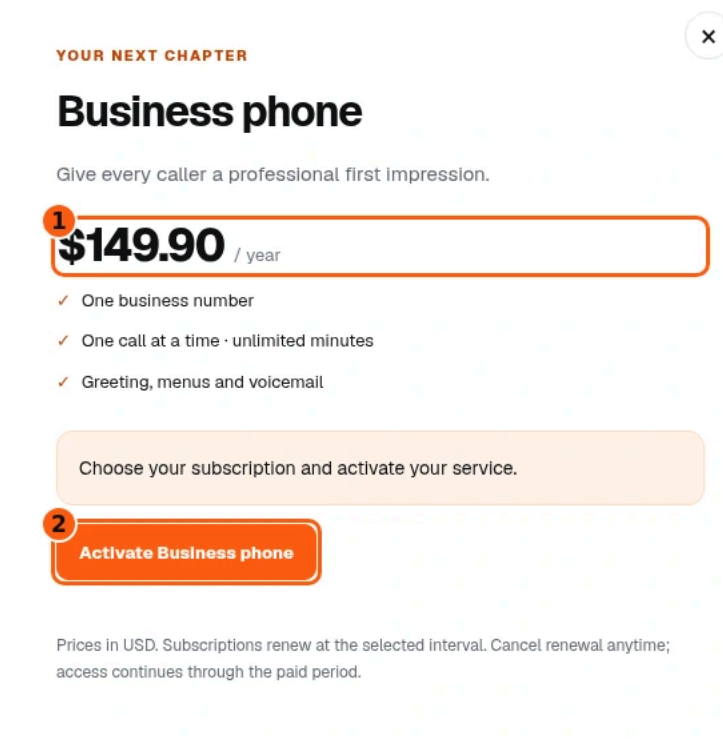

The Monthly and Yearly switch changes the displayed billing interval where a product offers both. Some products remain monthly-only. Read the actual price and interval on the product you are considering.

Choose Explore on a product to read its details. Looking at the details does not buy it. Coming soon is not an active service.

WHAT HAPPENS NEXT

A service-details window explains the product and the access or activation options available to this account.

Review before activating

Atelier Demo - Example account and simulated responses.

- 1 Read the product's current displayed price and interval.
- 2 Activation is conditional on this account's available checkout.

Check the service name, price, interval and included features in the details window.

If activation is available, its button starts the secure checkout flow. If the screen says checkout is not open, the product cannot be activated from that account right now.

The example screen uses PayPal Sandbox. It is a test-payment environment, not a live customer charge. Do not treat a Sandbox screenshot as proof of a real paid purchase.

WHAT HAPPENS NEXT

Nothing is activated merely by opening this window. Access changes only after the platform verifies the relevant purchase or existing entitlement.

If payment is still pending, check it—do not buy twice

YOUR NEXT CHAPTER

Business phone

Give every caller a professional first impression.

\$14.99 / month

- ✓ One business number
- ✓ One call at a time · unlimited minutes
- ✓ Greeting, menus and voicemail

1

Checking your payment. Once PayPal confirms it, Business phone will unlock. Use Refresh to check again—no new payment is needed.

2

Check payment status

Prices in USD. Subscriptions renew at the selected interval. Cancel renewal anytime; access continues through the paid period.

Atelier Demo · Example account and simulated responses.

- 1 This purchase is still waiting for verification.
- 2 Check the existing payment instead of starting another.

A payment-pending message means approval has not yet become verified service access.

Use Check payment status when offered. It checks the existing purchase; it is not a second checkout.

When verification succeeds, the service appears in your active area. If it stays pending, keep the existing purchase details and ask for support rather than repeatedly creating new payments.

WHAT HAPPENS NEXT

The screen either confirms access or continues to show that verification is pending. A return from the payment provider alone is not the confirmation.

Check renewal and paid access

BILLING & ACCESS

Image Maker

State-of-the-art images. Just ask iAmBruno™. Add references. Keep refining.

1

Image Maker is active through 11/30/2026. Your subscription renews unless you cancel it.

Open Image Maker

2

Cancel renewal

Atelier Demo · Example account and simulated responses.

- 1 Paid-through and renewal status.
- 2 Cancel renewal opens a separate confirmation.

On an active service card, choose Billing. Read the paid-through date and renewal message.

Cancel renewal stops future renewals for that subscription after you confirm it. It does not delete the account or immediately remove the access already paid for.

If you opened the cancellation confirmation by mistake, choose Keep subscription. A service included with another entitlement may not have its own cancellable subscription here.

WHAT HAPPENS NEXT

The billing message tells you whether the service renews and how long current access lasts.

Pause at the cancellation confirmation

BILLING & ACCESS

Image Maker

State-of-the-art images. Just ask iAmBruno™. Add references. Keep refining.

Image Maker is active through 11/30/2026. Your subscription renews unless you cancel it.

Open Image Maker

Cancel renewal

1

Stop future renewals? Access remains through the paid period.

Yes, cancel renewal

Keep subscription

Atelier Demo · Example account and simulated responses.

1 This is the final decision, not just a details window.

Read the confirmation before choosing either button.

Keep subscription closes this confirmation and leaves renewal unchanged.

Yes, cancel renewal sends the cancellation request. Use it only when you want future renewals stopped for this service. Already-paid access remains through the paid period.

WHAT HAPPENS NEXT

You can back out without changing renewal, or deliberately confirm the service's cancellation.

Update the business logo

YOUR BRAND, BEAUTIFULLY

Make your mark.

1

☒ Refine my logo ☐ Create a new logo

What would you like to change?

Keep the symbol, refine the lettering, and make the logo feel more modern...

Horizontal, Polished, Transparent PNG.
Powered by GPT Image 2 - Low.

Make my logo +

2

OR USE YOUR OWN

Drop your logo here
or choose a file - PNG, JPG or WebP

Your previous versions stay saved.

3

Your logo history

Current logo

Use version 1

Choose a previous version to make it your current logo again. Existing saved documents are not rewritten.

Atelier Demo - Example account and simulated responses.

- 1 Describe a new logo or a refinement.
- 2 Upload a logo you already own.
- 3 Choose an earlier saved version to restore it.

Choose the pencil on the logo in the business header.

You can upload your own PNG, JPG or WebP, refine the current logo, or describe a new one using the options in the actual logo window.

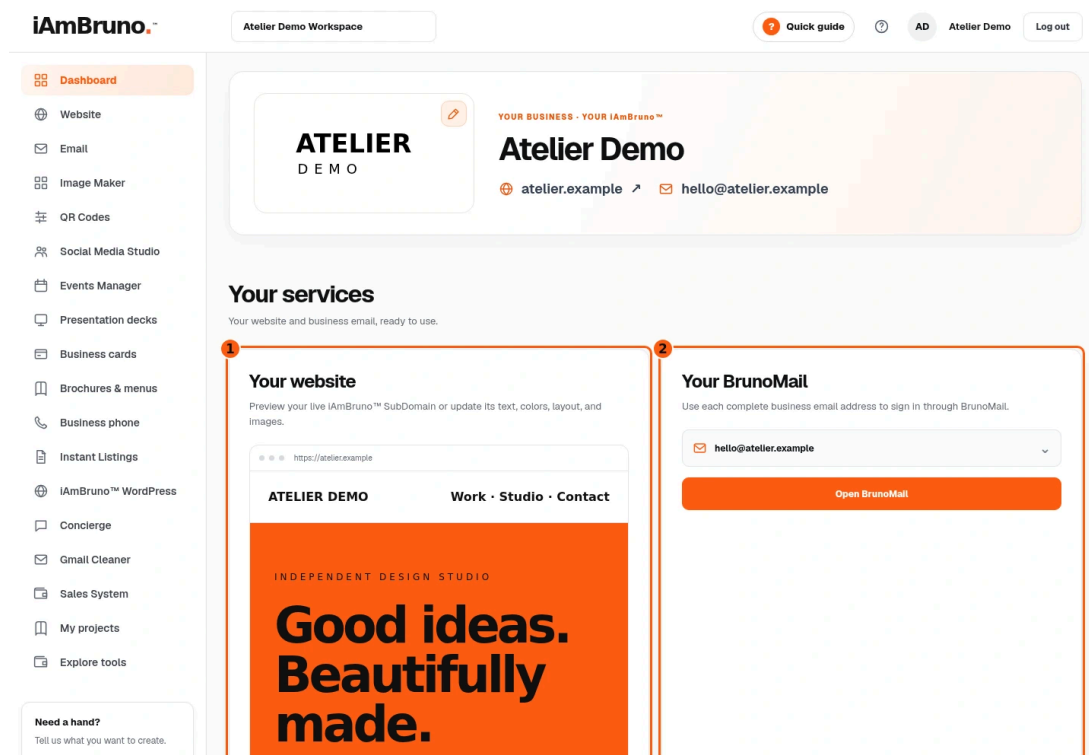

Saved logo versions appear below. Choosing an earlier version makes it current again. Changing this logo does not rewrite business cards, brochures or other documents you have already saved.

Choose Make my logo only when you intend to start the requested logo work. Uploading or restoring an existing version is a different action. Check any access or cost message the platform shows before continuing.

WHAT HAPPENS NEXT

The business header shows the current logo, with earlier saved logo versions available in its history.

If your account includes a website plan

Atelier Demo - Example account and simulated responses.

- 1 Your example website and its address.
- 2 Business email included with this sample managed plan.

Your dashboard may also show a website preview and its public address. View website opens that site; it is different from opening a creative tool.

Edit website is shown only for the plans and sites that support this editor. Other sites may have a different editing entry point.

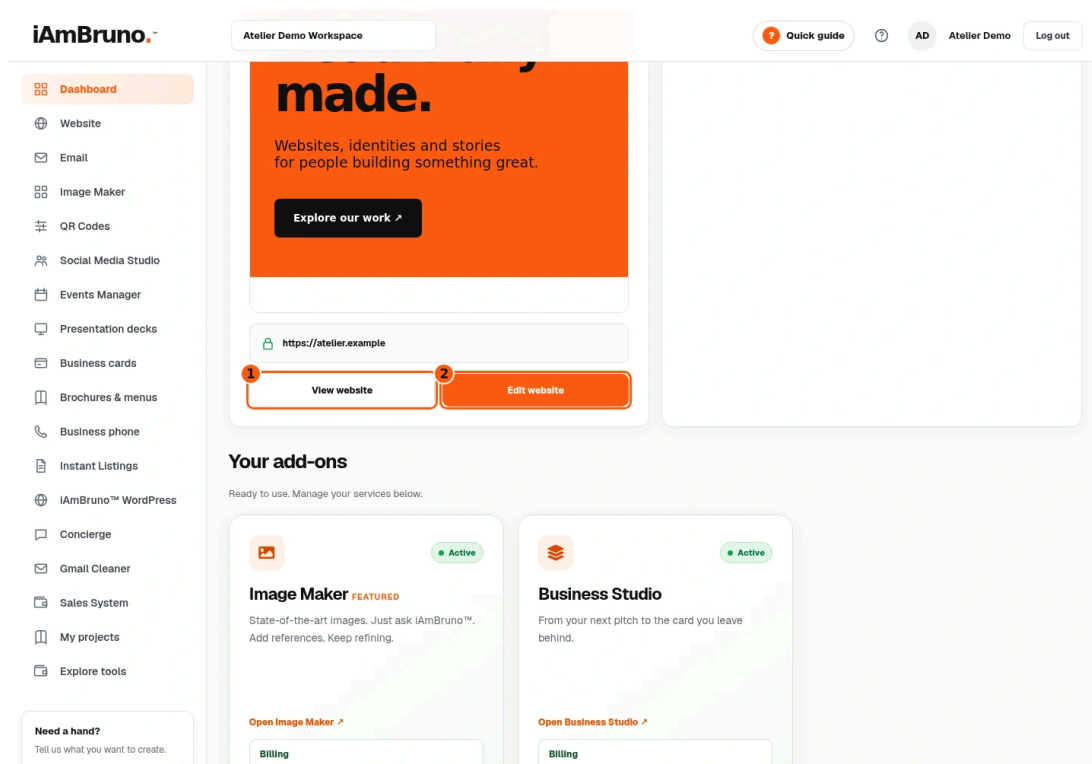

Managed plans with email show the included mailbox area and Open BrunoMail. Use each full business email address and its mailbox password to sign into webmail.

Your website plan and the creative services below it are separate. Do not assume that owning a website activates every tool in the catalogue.

WHAT HAPPENS NEXT

You can tell which website and email facilities are included, without mistaking optional add-ons for part of the website plan.

Open your site or its editor

Atelier Demo · Example account and simulated responses.

1 Open the public website.

2 Edit this supported website.

View website opens the public site. Visitors see that site; it is separate from your Bruno dashboard.

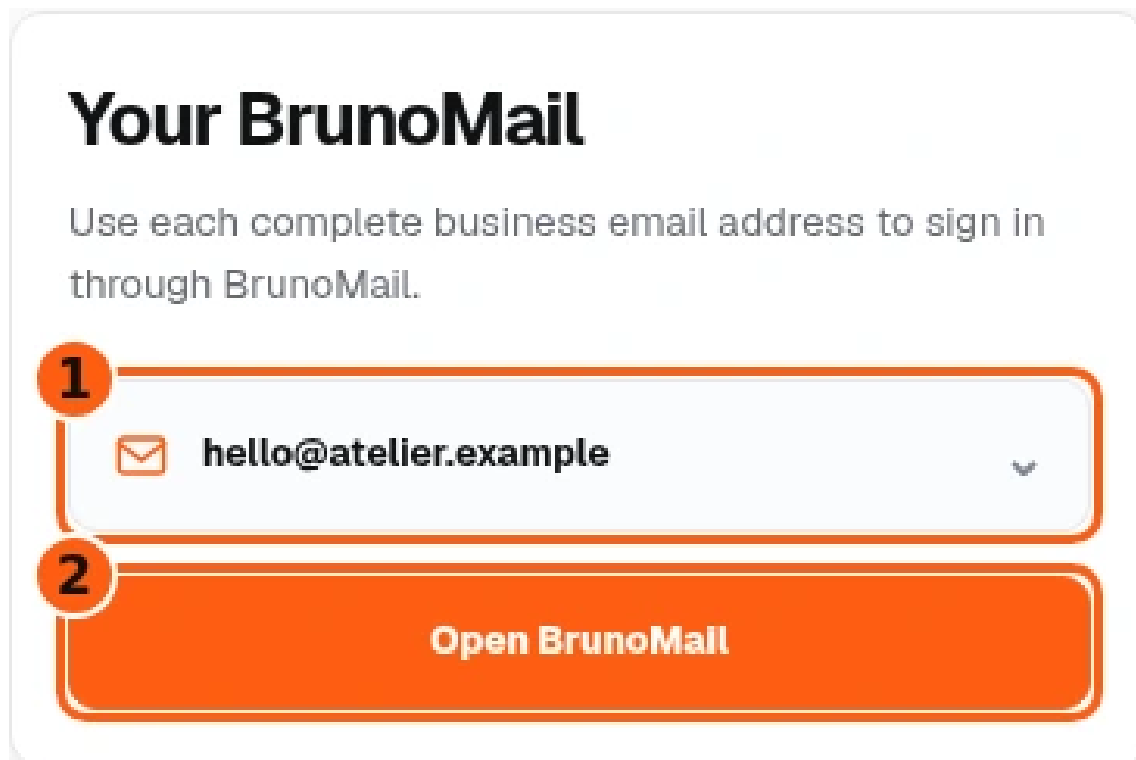

Edit website opens the site editor when your plan offers it. This sample SubDomain plan supports editing; a free preview or a different site type can have different controls.

Opening the editor is a separate action from publishing changes. Use the website guide for your plan's actual editing and save controls.

WHAT HAPPENS NEXT

The chosen destination opens. Returning to Dashboard still shows the website plan and separate add-on services.

Open your included business email

Atelier Demo - Example account and simulated responses.

- 1 Your included full business email address.
- 2 Open the webmail sign-in page.

This example shows the email card on a phone; website and email cards stack vertically at this width. On a desktop they can appear side by side.

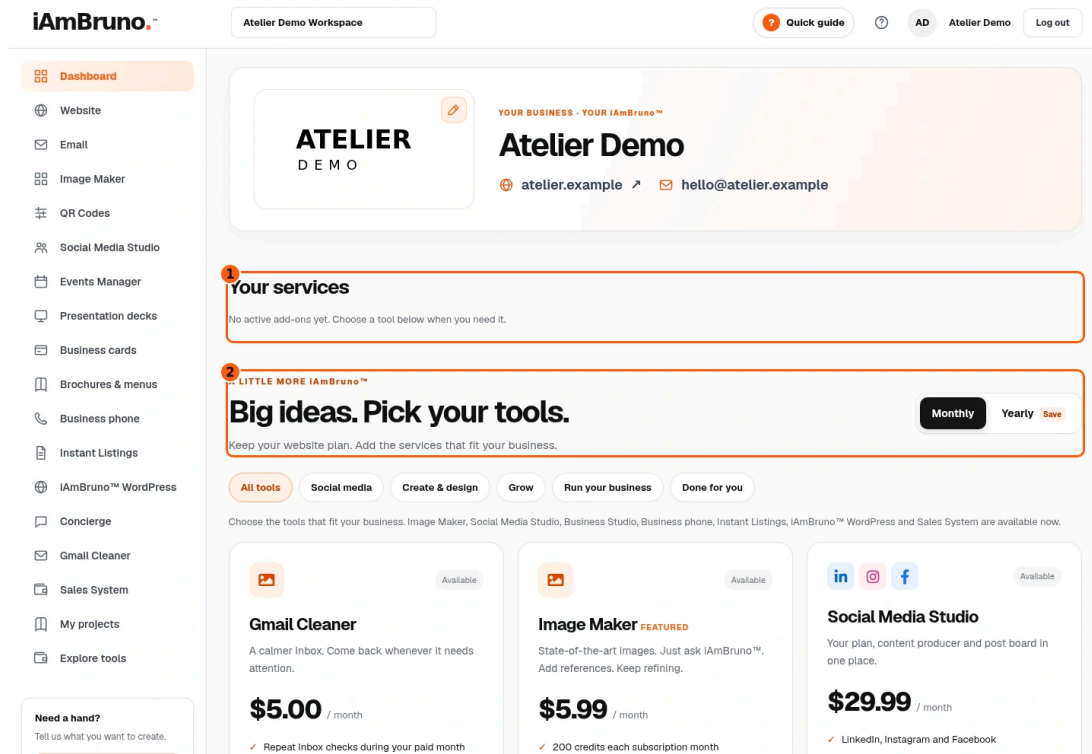

The complete business email address appears in the mailbox list. Open BrunoMail takes you to webmail, not your personal Gmail inbox.

Use the full business email address and its mailbox password to sign in. Your Bruno account password is not automatically that mailbox password. Follow the Business email guide if you need to manage the mailbox.

WHAT HAPPENS NEXT

You can identify the correct mailbox and open its webmail. This card is only shown when business email is included.

A new account can have no active add-ons yet

Atelier Demo - Example account and simulated responses.

- 1 No active add-ons in this example account.
- 2 Available tools are still visible below.

An empty Your services area is normal when no tool has been activated for this account. It is not a missing gallery.

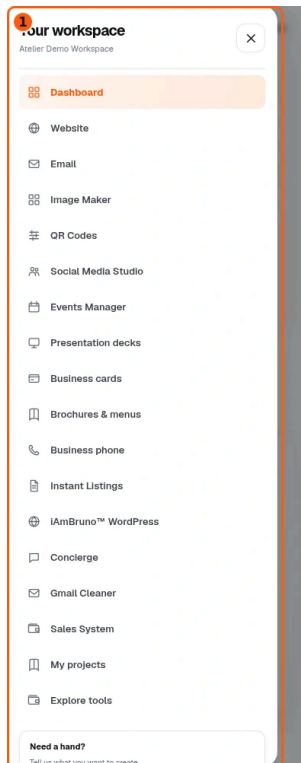

Explore the catalogue below, read a service's details and activate it only if the required checkout is offered to your account. QR Codes is free and can be opened from the menu.

If you expected a paid service, check you used the account associated with that purchase. Use its payment-status or support options before buying the same service again.

WHAT HAPPENS NEXT

You understand why available tools and active services are different, and can choose the next step without a duplicate purchase.

Using Bruno on your phone

Atelier Demo · Example account and simulated responses.

- 1 The expanded mobile menu contains the same service links.

Tap Menu in the top-right corner to open this navigation.

Choose the service you need. The menu closes and the selected service opens. Dashboard brings you back to your active services.

The ? Quick guide control opens help for the screen you are using. You can replay the short tour, read its illustrated manual or keep the PDF.

WHAT HAPPENS NEXT

You can find your tools on a phone even though the desktop sidebar is hidden.

Come back whenever you need it.

The short first-visit tour has three stops. This manual gives you the full explanation; you can return to it from Quick guide.

In your dashboard, choose **Quick guide → Show me around** to replay the short tour. Use **Read the guide** or **Download PDF** for these complete instructions.

Need help? Email help@iambruno.com with the service name and what happened. Do not send passwords or connection keys.
